

ADAPTORS - API & CORING

We provide high quality CNC machined adaptors to suit all vertical and HDD drilling applications. Better quality adaptors made to CNC standards reduce wear on your head, drill rods, and bits. CNC is the automated control of machining tools by a computer to achieve perfect threads and offsets every time. All adaptors are made from heat treated steel. Where possible, adaptors are phosphate coated to prevent galling.

Maintaining your stock of adaptors that can connect multiple rolling sizes and across different rigs is always difficult. Blick stock a wide range of adaptors, sub savers and drive chucks to suit most requirements.

If you can't find the product you are looking for, let us know and we will be happy to help. Every month we provide customised adaptors to our clients to suit their unique needs.
