

SPECIALIST DIAMOND BLADES

We stock an extensive range of high quality diamond blades; for hand saws, brick saws and angle grinders.

CONCRETE

We have **segmented blades** and **turbo wave blades** with a castellated rim. Both cut concrete great. The Turbo Wave is often used to cut harder materials as well. Our most popular option here is the segmented blade.

For a more detailed list of concrete, asphalt and multi-purpose blades, see our **Diamond Blades - Concrete and Asphalt Solution Finder**

| Diameter | Segmented | Turbo Wave |
|----------|-----------|------------|
| 105mm | 1110206 | 1110316 |
| 115mm | 1110211 | 1110321 |
| 125mm | 1110216 | 1110326 |
| 150mm | 1110221 | 1110336 |
| 180mm | 1110226 | 1110341 |
| 200mm | | 1110346 |
| 230mm | 1110236 | 1110351 |
| 250mm | | 1110356 |
| 300mm | 1110246 | 1110361 |
| 350mm | 1110261 | 1110366 |
| 400mm | 1110266 | |

BRICK

Our **bricksaw blades** are designed to be used on a bricksaw and have a **"silent"** copper core to reduce the noise created when using the blade. Definitely the best option. An alternative is the **Turbo Wave**.

| Silent Core | Turbo Wave |
|-------------|------------|
| | 1110316 |
| | 1110321 |
| | 1110326 |
| | 1110336 |
| | 1110341 |
| | 1110346 |
| | 1110351 |
| | 1110356 |
| 1110126 | 1110361 |
| 1110131 | 1110366 |

HARD STONE

We have **turbo wave blades** with a castellated rim specifically designed for hard stone. For a finer cut try a **continuous rim blade**. Our most popular option here is the turbo wave blade. The **Tiger Turbo Blade** is a third option as a higher spec Turbo Wave with diamond on the side of the blade to reduce wear on the body when cutting hard stone.

SPECIALIST DIAMOND BLADES

We stock an extensive range of high quality diamond blades; for hand saws, brick saws and angle grinders.

TILE

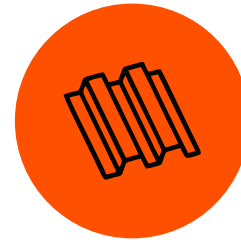

We have our standard continuous rim blades which are designed to cut tile and harder material and thin turbo tile for the finest cut. Our most popular option is the continuous rim blade.

FIBREGLASS

We have slightly segmented blades called **vacuum brazed blades** which are the newest technology and we still supply **electroplated blades**.

Our most popular option here is the vacuum brazed blade, and we only bring electroplated blades in to order.

SHEET METAL

Our **vacuum brazed blades** are designed to cut sheet metal as well as fiberglass. They are often called **rescue blades** in the bigger diameters as they are used to cut people out of cars after an accident.

| Diameter | Continuous Rim | Thin Turbo Tile |
|----------|----------------|-----------------|
| 105mm | 1110071 | 1110301 |
| 115mm | 1110076 | 1110306 |
| 125mm | 1110081 | |
| 150mm | 1110086 | |
| 180mm | | |
| 200mm | | |
| 230mm | 1110101 | |
| 250mm | 1110106 | |
| 300mm | | |
| 350mm | 1110116 | |
