PERFORMANCE

This is our popular core drill that we've been providing for ten years.

Above 50mm **great budget option** now they are being sold off as the spiral option is steadily replacing them.

Up to 45mm 1/2 R male and 300mm		Over 52mm 1 1/4 UNC and 400mm

DIAMOND CORE DRILLS

We have an extensive range of specialised drills to suit concrete, asphalt, hardstone, porcelain and ceramic tiles.

We believe we stock the best value core drills on the market. Our core drills range from 6mm to 250mm as standard stock, with larger sizes and customised barrel lengths available.

VALUE SINTERED

Long life sintered core drill suitable for **concrete**, **hard stone** to **granite** and even **tile**.
Fits in a standard drill chuck.

ELECTROPLATED

Thin kerf electroplated core drills provide thin clean cut designed for **granite** and **engineered stone**. Shorter life as a bonded product and can only be used **with water** because edge will wear quickly if used too dry and make tool impotent. **Fits in a standard drill chuck**

Standard Chuck
